

Bungee Equalizer

Additional Operating Instructions

These are additional instructions to the Constant Flow Land Inflatable Operation Manual

Bungee Equalizers come in many different lengths, colours, and number of lanes. These additional operating instructions cover any device made by Airquee similar to the pictures above. If you are in any doubt about anything mentioned in this manual or its suitability for your product or circumstances, please contact us using any of the methods given on our website, www.airquee.com/contact.

For all guidance relating to the safe use and operation of an inflatable including safe positioning, anchoring, inflation/deflation, and regular checks please refer to our Constant Flow Land Inflatable Operation Manual. A copy of this can be downloaded by scanning the QR code on the filler pipe of your product or by visiting www.airquee.com/manuals.

As owner/operator it is your responsibility to write and carry out your own risk assessment before attempting to use this product. This manual, together with the Constant Flow Land Inflatable Operation Manual must be read before attempting to setup/use the product.

Additional Equipment

Belts	Helmets	Neck Braces	Bungee Cords	Batons
				

- The above equipment quantities will depend on the size and type of bungee equalizer you have.
- The bungee cords, and other items are consumable. They will wear and stretch over time and need to be replaced.

This inflatable can be set up and packed away by 2 persons who have had proper manual handling training and use the correct equipment to move the inflatable. You should conduct your own manual handling risk assessment to determine a safe set up procedure and number of people required based on your circumstances.

For information regarding dimensions, weight, zips, filler pipes etc please refer to the email we sent you with the finished pictures and data.

INTENDED USE OF THE PRODUCT

The Bungee Equalizer was designed to be a head-to-head competition using the strength and body movement coordination of one user against other. Users take a velcro baton, ball or similar and run and

stretch to the end of the run as far as they can and stick the baton to the velcro line or ball onto the net. As each player try to do this, they are pulling against their opponent making it harder for them to achieve the same result.

OPERATING GUIDELINES/RULES OF PLAY

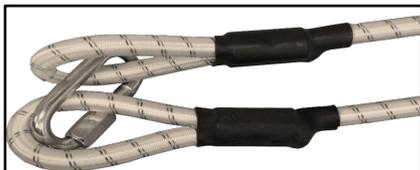

- **Users should NOT be ALLOWED TO CLIMB on the WALLS.**
- **Be prepared – warn your clients that they may be abruptly propelled back to their starting position by the bungee cord.**
- **Players must stay in their own lanes.**
- **Players must be of similar build/strength/size.**
- **Participants should not engage in the game if they have any of the following conditions: current or previous injury to the back or neck, chronic knee, or other joint conditions; any respiratory conditions, including but not limited to asthma or bronchitis; any heart related or circulatory conditions or pregnancy.**
- **Do not allow players to wrap the bungee cords around any part of the body (neck, hands, feet...)**
- **BEFORE, DURING AND AFTER USE, the bungee cords, harnesses, and their connection points should be checked for wear. If signs of wear are found, PLAY MUST BE STOPPED AND ANY WORN ITEMS MUST BE REPLACED IMMEDIATELY.**
- **Do not use the product without the supplied safety equipment. The supplied neck braces and helmets must be always worn.**
- **For users weighing up to 60kg (9.45 stone) use only one bungee cord.**
- **For users between 60kg and 120kg (18.9 stones) use both bungee cords.**
- **The two bungee cords combined can hold a user of a maximum weight of 120kg.**

For more information regarding operating guidelines and rules of play please see the Constant Flow Land Inflatable - Operation Manual.

SETUP

The inflatable should be positioned, inflated and anchored according to the Constant Flow Land Manual instructions.

1. Once inflated push the bungee cord(s) through the central wall or column.
2. Attach the carabiner to the loose ends of the bungee cord(s) (one or both, depending on the weight of the user) and then ensure the carabiner is screwed closed.

3. Check all the accessories for wear and tear and always perform a test run before allowing users to play.

In addition to the checks that you must perform, all inflatables require an annual inspection. Please refer to local legislation for the specific requirements of the country or region that you are operating in.

The Airquee Operation Manual (the "Manual") is proprietary to Airquee Ltd, SC Airquee SRL, Airquee Northern Ireland Limited and Airquee Ireland Limited collectively known as ("Airquee") and no ownership rights are hereby transferred.
